

## BUSINESS ANALYTICS TASK 1 – INSIGHTS & RECOMMENDATIONS REPORT

### 1. Executive Summary

Objective: To clean raw sales data, identify key performance indicators (KPIs), and build an interactive dashboard to assist management in revenue optimization.

Tools Used: Microsoft Excel (Data Cleaning & Pivot Tables) and Power BI Desktop (Dashboard Creation).

### 2. Key Insights Found

Top Performing Region: The West Region generated the highest sales revenue across all territories.

Top Product Category: Technology and Furniture emerged as the leading revenue-driving product categories.

Underperforming Region: The South Region recorded the lowest sales performance, showing a significant gap in market penetration.

### 3. Strategic Business Recommendations

Targeted Marketing Campaigns: Introduce localized promotions, loyalty discounts, or marketing campaigns in the South Region to capture market share and boost underperforming sales.

Inventory Optimization: Maintain high stock levels for top-selling Technology items to avoid stockouts and maximize seasonal revenue opportunities.
